## Overnight Beauty

While-you-sleep fixes  
for skin, hair, nails

### Dermatologist-recommended M.D. FORTÉ<sup>®</sup> Facial Cream:

Plagued by dull or flaky skin?

Instead of vitamin A, use a glycolic acid cream to slough away dead skin cells, which will help increase moisture retention.

Unlike other glycolic acid products, M.D. FORTÉ<sup>®</sup> Facial Cream has been buffered to make it less acidic (i.e., less harsh) than glycolic acid—plus it's time-released, so it works all night.
